WIRELESS PNEUMATIC THERMOSTAT

FEATURES

- Retrofit existing pneumatic thermostats in minutes
- Delivers DDC-like functionality
- Remote monitoring of temperature
- Remote monitoring of branch pressure
- Cell/Pager alarm notification
- Remote control of setpoint
- Automatic self-calibration
- Occupancy override notification
- Programmable temperature setbacks
- No computer needed for programming for standalone thermostats
- Easy to install wireless system
- Optional BACnet/IP and LON interface to integrate with the existing Building Automation System
- Optional after-hour tenant billing package

BENEFITS

- Digital zone control optimizes energy usage and comfort
- Programmable temperature setbacks saves energy
- Enables use for utility Demand Response programs
- Occupancy override logs tenant's after-hour usage
- Built-in diagnostics lowers maintenance cost

Plug and play wireless pneumatic thermostat replaces existing Siemens, Honeywell, Johnson Controls, Robertshaw, etc. units in minutes.

The worldwide patent pending Wireless Pneumatic Thermostat delivers DDC-like functionality at a fraction of the time and cost without the need to change out pneumatic pipes, run wires, replace actuators or disturb tenants. Not necessary to upgrade entire building at one time; may selectively retrofit individual thermostats for incremental benefits.
